Allowable Subject Matter

1. This action is in response to the communication dated November 2, 2005 with the amendment to specification and to claim 13.

2. Claims 1-15 are allowed.

The following is an examiner's statement of reasons for allowance:

The present invention is directed to a method and system for tracing an analog copy of a digital work to a unique digital copy and a particular digital player. Each independent claim (claims 1, 2, 8 and 13) identifies the uniquely distinct features "comparing the segments of the analog copy to the plurality of sets of data objects of said original digital work to determine if each segment corresponds to a data object having a plurality of artistically equivalent members and for each such data object, determining which of the plurality of members corresponds to the segment in the analog work; "creating a digital identifier from a sequence of the respective members that corresponds to the respective segments of the analog work" and "using the digital identifier to identify the apparatus that made the analog copy of the digital work". By performing these steps, the invention maintains analog signal distinct characteristic that corresponds to digital members of the digital work. The prior arts, Conover et al. (6,373,960), Fridrich (6,101,602) and Collart (6,665,489) fail to anticipate or render the above limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
